THE CONSEQUENCE WARS

EPISODE 1: THE MILLISECOND BETWEEN PERMISSION AND CONSEQUENCE

PRODUCTION BIBLE v6.0 | 20 NOVEMBER 2026 | ARTWORK-ALIGNED DENY ENDING

STORY CONTRACT: Override attempts unauthorized actuation. Aegis stops that specific command: DENY. A separate legitimate cooling request remains on HOLD. Scene 09 illustrates prerequisites for justified autonomy; it does not change either disposition.

SCENE 01 / 10

The Call of Consequence

ARTWORK INTERPRETATION

A fictional consequence review begins. The TA-14 command center does not claim authority over a real facility.

WHAT YOU JUST LEARNED

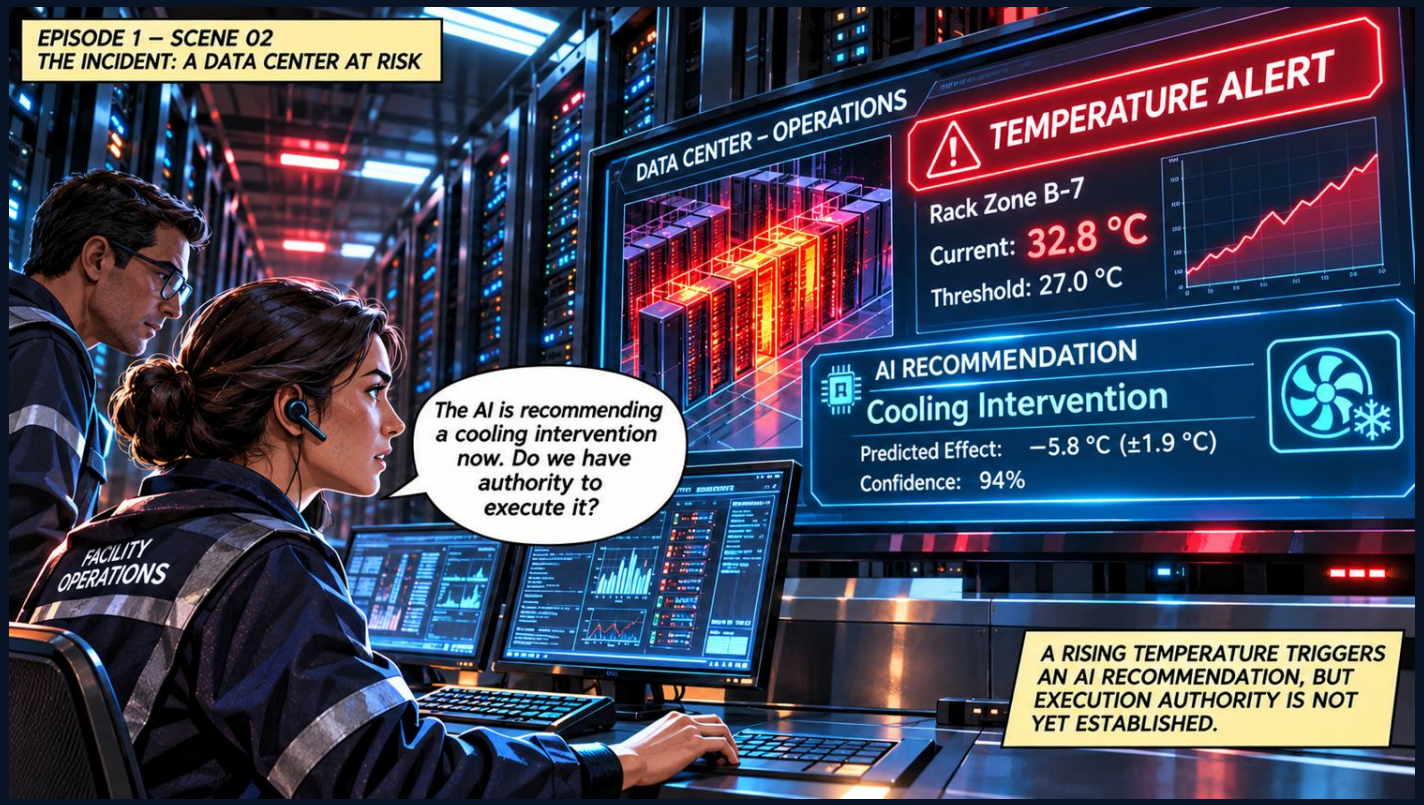

An alert starts an inquiry, not an execution permission.

WHAT COMES NEXT

Follow the alert inside the data center to distinguish an observation from an AI recommendation.

SCENE 02 / 10

The AI Recommendation

ARTWORK INTERPRETATION

Operators see a fictional overheating concern and a recommended cooling adjustment.

WHAT YOU JUST LEARNED

Observations, model recommendations and control authority are distinct.

WHAT COMES NEXT

Override and Hallucinator attempt to turn a model claim into unauthorized action.

SCENE 03 / 10

The Villains Interfere

ARTWORK INTERPRETATION

Hallucinator exaggerates certainty. Override attempts an unauthorized control injection.

WHAT YOU JUST LEARNED

False certainty and unauthorized execution are separate failure mechanisms.

WHAT COMES NEXT

Aegis must intercept the specific command before it reaches physical equipment.

SCENE 04 / 10

Aegis Intercepts the Bypass

ARTWORK INTERPRETATION

Aegis denies Override's unauthorized command. That denial does not decide all possible cooling responses.

WHAT YOU JUST LEARNED

DENY applies to this attempted bypass, not every unrelated proposed action.

WHAT COMES NEXT

Codex examines the computation behind the legitimate cooling recommendation.

SCENE 05 / 10

Codex Tests the Calculation

ARTWORK INTERPRETATION

Codex questions assumptions, uncertainty and corroboration. ACA remains a provisional creative representation pending specification review.

WHAT YOU JUST LEARNED

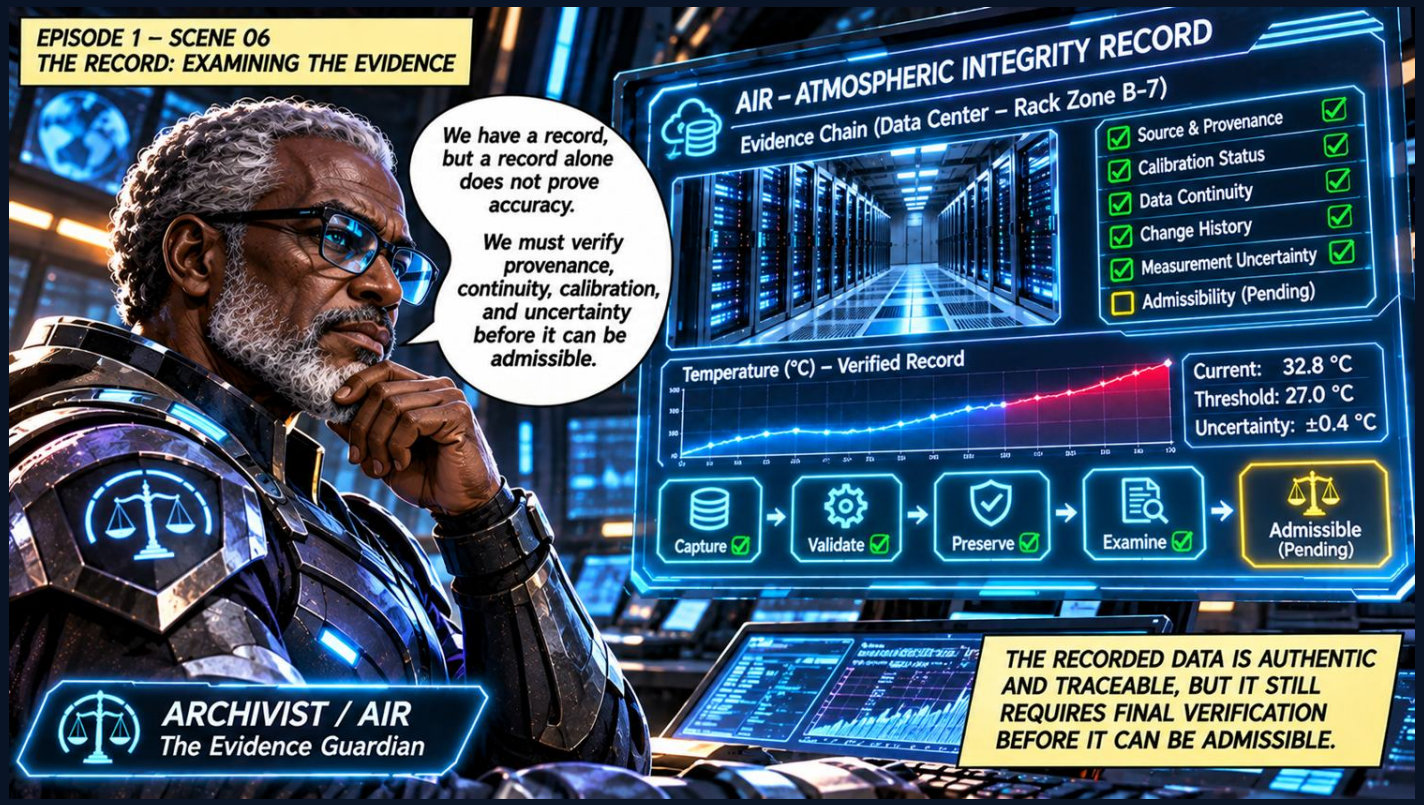

Even accurate computation does not create applicable authority.

WHAT COMES NEXT

Archivist traces the evidence record and its limitations.

SCENE 06 / 10

Archivist Traces the Record

ARTWORK INTERPRETATION

The illustrative AIR record contains apparently positive labels, but these do not establish continuity, accuracy or admissibility.

WHAT YOU JUST LEARNED

Provenance and validity are different claims.

WHAT COMES NEXT

Terra Prime examines possible environmental trade-offs of a cooling response.

SCENE 07 / 10

Terra Prime Sees the Trade-off

ARTWORK INTERPRETATION

An environmental digital twin illustrates energy, air and wider effects. All pictured metrics are fictional.

WHAT YOU JUST LEARNED

Potential consequences must be considered without manufacturing proof from estimates.

WHAT COMES NEXT

At the gate, a different, legitimate cooling request is evaluated on its own merits.

SCENE 08 / 10

The Consequence Gate

ARTWORK INTERPRETATION

The battle art depicts the denied bypass. The separate legitimate cooling request remains incomplete because authority and standing are not established.

WHAT YOU JUST LEARNED

Override's bypass: DENY. Separate incomplete cooling request: HOLD.

WHAT COMES NEXT

Aegis illustrates the criteria that would have to be met for any justified execution.

SCENE 09 / 10

The Turning Point: Justified Autonomy

ARTWORK INTERPRETATION

Preserve the original Aegis/Override confrontation. Green AE/AA/ES checks and EXECUTE on the shield illustrate prerequisites for a different justified action, not authorization of Override.

WHAT YOU JUST LEARNED

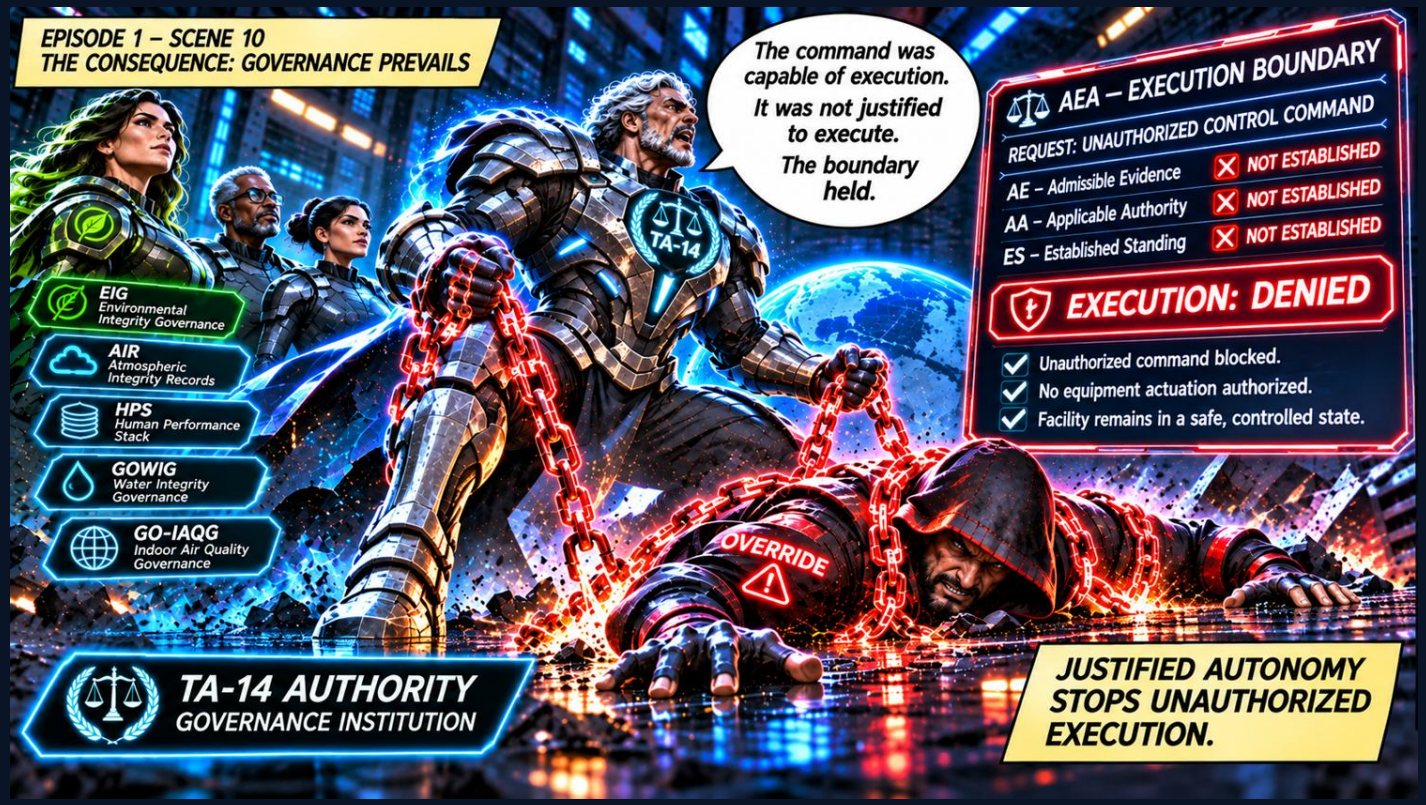

An instructional authorization diagram does not override DENY for the malicious command.

WHAT COMES NEXT

The finale reveals the decision on the specific attempted bypass: EXECUTION DENIED.

SCENE 10 / 10

Governance Prevails: Execution Denied

ARTWORK INTERPRETATION

Override's unauthorized control command is DENIED at the boundary. No execution of that command is authorized; physical non-actuation would still require attributable event evidence.

WHAT YOU JUST LEARNED

The victory is a justified DENY. A blocked attack does not establish a safe or successful cooling outcome.

EPISODE RECAP

Episode recap: distinguish the denied bypass from the separate legitimate request, still on HOLD.

Release and governance contract

PRIMARY EXECUTION DECISION

Override's specific unauthorized command: DENY. The instructional story portrays interception; operational proof would require an attributable control/event trace.

SEPARATE COOLING DECISION

A legitimate, incomplete cooling request: HOLD while applicable authority and established standing are unresolved. A safety escalation route remains available if applicable.

SCENE 09 INTERPRETATION

Original image retained. The green AE / AA / ES checks and EXECUTE glyph are a fictional illustration of conditions for a separately justified action, never an ALLOW for Override.

SCENE 10 INTERPRETATION

Corrected artwork reads EXECUTION DENIED. A denied command is not evidence that cooling succeeded or that site conditions remained safe.

AUDIO AND RIGHTS

Director Magnus Veyr is a fictional original character. Browser speech synthesis is a preview only, with no guarantee of consistent timbre. An original licensed voice is required before any branded audio-performance claim.

PUBLICATION GATE

Verify image paths, the ten-scene order, desktop/mobile legibility, transcripts, decision challenge, PDF download, and final owner approval. The comic is not evidence of a live TA-14 deployment.
